Annualized distribution yield is calculated by multiplying the sum of the quarter's stated distribution per share by four and dividing the result by the prior quarter's NAV per share.

The final determination of the source and tax characteristics of all distributions will be made after year-end and reported to you on Form 1099-DIV. Form 1099-DIV, which is mailed after the close of the calendar year, will specify how the distributions paid by a Fund during the year should be characterized and reported on your tax return (e.g. ordinary income, return of capital and capital gain).

Investment income may be subject to certain state and local taxes, and, depending on your tax status, the federal alternative minimum tax. Capital gains are not exempt from federal taxes.
