

Emerging Markets Equity Strategy

STRATEGY DESCRIPTION & HIGHLIGHTS

Our Emerging Markets Equity Strategy seeks to invest in companies located in emerging markets that are exhibiting above-average profitability and earnings growth and are trading at reasonable valuations. Exposure to these companies is gained through the purchase of American Depositary Receipts (ADRs) and U.S. listed shares of foreign companies. As a result, clients have the opportunity to invest in companies in emerging markets without the operational burdens inherent to owning ordinary shares. Our objective is to outperform comparable international stock indices over a full market cycle.

- *Efficient and cost effective method to achieve exposure to international companies in emerging markets⁽¹⁾.*
- *A consistent and disciplined investment style.*

⁽¹⁾ Renaissance determines an issuer's country classification based on company filings and data provided by third-party sources such as Bloomberg or FactSet. Renaissance considers an issuer to be located in an emerging market country if the issuer is domiciled or incorporated in an emerging market country (as defined by the iShares MSCI Emerging Markets ETF) or exhibits risk characteristics (e.g., economic, geopolitical and regulatory risks) similar to emerging market countries.

⁽²⁾ Renaissance primary benchmark.

⁽³⁾ Weights as of the end of the presentation period. Cumulative total weighting may not add up to 100% due to rounding of percentages to the nearest decimal place.

⁽⁴⁾ Based on a representative account of the strategy discussed and shown as supplemental information to the GIPS Report. Portfolio characteristics (e.g., sector weights, valuation, growth rate) are based on a representative account that we believe is illustrative of the strategy. All accounts in the strategy are invested identically in the same securities unless a client has imposed restrictions. Characteristics and/or holdings on a given date may vary due to pending trades.

⁽⁵⁾ Percentages may not match the actual difference between the representative account and the benchmark due to rounding of percentages to the nearest decimal place.

⁽⁶⁾ Composite statistics based on returns calculated quarterly versus the iShares MSCI Emerging Markets ETF Index. The calculation methodology for each statistic is available upon request.

Total annual fees charged by wrap sponsors familiar to RIM are generally in the range of 0.75% to 3.00%. Accordingly, RIM assumes a 3% total wrap fee when calculating net returns. Past performance is not indicative of future returns. Performance for periods of one year or less is not annualized. All returns are shown in U.S. dollars. Please refer to the GIPS Report on the last page for additional information including the calculation of net of fees performance.

Renaissance has a Client Servicing and Marketing Agreement with its affiliate AMG Funds LLC, a subsidiary of Affiliated Managers Group (AMG), under which AMG Funds markets Renaissance's products to third parties (such as brokerage houses and investment consultants) and/or to other platforms. AMG Funds is paid a fee by Renaissance for these services.

FINAL 12/31/2025																	

* Beginning May 1, 2015, "pure" gross-of-fees returns do not reflect the deduction of any expenses, including trading costs as these are wrap accounts. "Pure" gross-of-fees returns are supplemental to net returns. From January 1, 2013 through April 30, 2015, the disclosed returns are presented gross of fees as these are institutional accounts.
 ** Not meaningful figure due to five or fewer accounts invested for the entire year.
 *** Renaissance Strategy AUA, Strategy, Firm AUA, and Firm assets under management include Non-Discretionary Assets (UMA Programs) for which Renaissance does not have trading authority. The Non-discretionary management of UMA Sponsor accounts consists of Renaissance providing the UMA Sponsor with changes to each participating Renaissance model portfolio on an ongoing basis.

Renaissance Investment Management (RIM) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. RIM has been independently verified for the periods from January 1, 2006 through December 31, 2025.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite maintenance, as well as calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Emerging Markets Equity Wrap Composite has had a performance examination for the periods January 1, 2008, through December 31, 2025. The verification and performance examination reports are available upon request.

GIPS® is a registered trademark of CFA Institute. The CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Firm Definition: The Renaissance Group LLC, which does business as Renaissance Investment Management (RIM), is a registered investment advisor established in 1978, with an office in Covington, KY. RIM is an affiliate of Affiliated Managers Group based in West Palm Beach, FL. RIM manages equity, tactical, balanced, and fixed income assets for a variety of clients including high net worth, institutional and sub-advisory relationships. A list of all composite descriptions is available upon request.

Composite Composition: The Emerging Markets Equity Wrap Composite (inception date: 1/1/2008) portfolios consist of approximately 45-55 equities exhibiting a combination of strong earnings growth, reasonable valuation, rising earnings expectations and profitability. The initial universe begins with all emerging markets domiciled American Depositary Receipts (ADRs) and U.S. listed shares of foreign corporations. Renaissance determines an issuer's country classification based on company filings and data provided by third-party sources such as Bloomberg or FactSet. Renaissance considers an issuer to be located in an emerging market country if the issuer is domiciled or incorporated in an emerging market country (as defined by the iShares MSCI Emerging Markets ETF) or exhibits risk characteristics (e.g., economic, geopolitical, and regulatory risks) similar to emerging market countries. The Emerging Markets Equity Wrap Composite, created on January 1, 2008, includes all fee-paying, non-wrap Emerging Markets Equity accounts from January 1, 2008, through April 30, 2015, and from January 1, 2017, to present. From May 1, 2015, through December 31, 2016, the Emerging Markets Equity Wrap composite included all Emerging Markets Equity fee-paying, direct-managed accounts with wrap fee arrangements and fee-paying SMA accounts that adhere to the SMA sponsor's inclusion guidelines. As of January 1, 2021, the composite was redefined to also include tax managed accounts which were previously excluded. The composite does not include non-fee-paying managed accounts. RIM will add new fully discretionary portfolios to the composite when they become fully discretionary based on the policies governing composite construction. RIM will exclude terminated portfolios from the composite after the last full month they were under management. Composite dispersion is measured using an asset-weighted standard deviation of gross returns of the portfolios.

Calculation of Performance Returns: Performance is calculated using total returns. Monthly composite performance is asset-weighted using beginning-of-period values. Rates of return are time-weighted with geometric linking of monthly returns. Valuations and returns are computed and stated in U.S. dollars. Account performance is based on total assets in the account, including cash and cash equivalents. Performance is actual performance.

RIM has chosen to present performance for pure gross-, gross- and net-of-fees. The pure gross-of-fees performance returns are presented before management and custodial fees and all trading expenses. The gross-of-fees performance returns are presented before deductions of management and custodial fees but after the deduction of all trading expenses. The net composite performance returns prior to April 30, 2015, and from January 1, 2017, to present are presented after deducting a model fee of 300 basis points from the gross return, which is the highest wrap fee represented by any RIM composite. The net composite performance returns from May 1, 2015, through December 31, 2016, are presented after deducting a model fee of 300 basis points from the pure gross return. Wrap fees and fees in lieu of commissions, vary across brokerage firms and accounts based upon account size and other factors. The various bundled fees may include trading, management, custodial expenses, and other administrative fees depending upon the wrap program selected. These gross- and net-of-fee investment results for the Renaissance Emerging Markets Equity Wrap Composite include reinvestment of dividends and other earnings. Clients' returns will be reduced by the advisory fee and any other expenses that may be incurred in the management of the client's investment advisory account. For example, if the gross annualized return of an account over a five-year period was 5.0%, deducting one twelfth of an annual advisory fee of 90 basis points each month on the ending monthly account

balance would produce a cumulative net return of 22.7%. The cumulative gross return of 5.0% per annum over a five-year period would be 28.3%. A \$1 million starting portfolio would thus have an ending net market value of \$1,227,096, \$56,262 less than the gross return ending value of \$1,283,359. There is no minimum asset size for inclusion in the composite. RIM uses trade date accounting and income is accrued. Actual performance may differ from composite returns, depending on the size of the account, brokerage commissions, investment guidelines and/or restrictions, inception date and other factors. After-tax results will vary from the returns presented herein for those accounts that are subject to taxation. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

Standard Deviation: The three-year annualized standard deviation measures the variability of the composite, and the benchmark returns over the preceding 36-month period. According to the GIPS Standards, this is not required for periods prior to 2011.

Investment Management Fees: Wrap fees, and fees in lieu of commissions, vary across brokerage firms and accounts based upon account size and other factors. Wrap fee schedules are provided by independent wrap sponsors and are available upon request from the wrap sponsor. Total annual fees charged by wrap sponsors familiar to RIM are generally in the range of .75% to 3.00%.

Benchmark: RIM compares its composite returns to the iShares MSCI Emerging Markets ETF which seeks to track the investment results of an index composed of large- and mid-capitalization emerging market equities. iShares ETF names are registered trademarks of Blackrock, Inc. Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce performance. Beginning August 10, 2020, market price returns for BlackRock and iShares ETFs are calculated using the closing price and account for distributions from the fund. Prior to August 10, 2020, market price returns for BlackRock and iShares ETFs were calculated using the midpoint price and accounted for distributions from the fund. The midpoint is the average of the bid/ask prices at 4:00 PM ET (when NAV is normally determined for most ETFs). The ETF performance has not been examined. This benchmark is shown for comparison purposes only. We are not trying to explicitly manage to this benchmark. This benchmark represents holdings whose characteristics may differ from the composite portfolios; however, it tends to represent the investment environment existing during the time periods shown. The holdings of the client portfolios in our composites may differ significantly from the securities that comprise the index shown. Renaissance changed the benchmark (from the MSCI Emerging Markets Index) retroactively as of 6/30/2020. The index has been selected to represent what RIM believes to be an appropriate benchmark with which to compare the composite performance.

Other: Performance data quoted in any Renaissance presentation represents historically achieved results and is no guarantee of future performance. Future investments may be made under materially different economic conditions, in different securities and using different investment strategies and these differences may have a significant effect on the results portrayed. Each of these material market or economic conditions may or may not be repeated. Therefore, there may be sharp differences between the performance shown and the actual performance results achieved by any particular client. The value of an investment may fall as well as rise. Please note that different types of investments involve varying degrees of risk and there can be no assurance that any specific investment will either be appropriate or profitable for a client or prospective client's investment portfolio. Investor principal is not guaranteed, and investors may not receive the full amount of their investment at the time of sale if asset values have fallen. No assurance can be given that an investor will not lose invested capital. Consultants supplied with these performance results are advised to use this data in accordance with SEC guidelines. The actual performance achieved by a client portfolio may be affected by a variety of factors, including the initial balance of the account, the timing and amount of any additions to or withdrawals from the portfolio, changes made to the account to reflect the specific investment needs or preferences of the client, duration, and timing of participation as a RIM client, and a client portfolio's risk tolerance, investment objectives, and investment time horizon. All investments carry a certain degree of risk, including the loss of principal and are not guaranteed by the U.S. government.

Risks of Emerging Markets Equity Strategy: Emerging Markets Equity Wrap Composite returns may show a high level of variability. In addition to market risk, the majority of any additional risk in these portfolios is related to specific stock selection, and RIM will have significant exposure to individual securities.
